

FREE COMPOST

Our organics program sends tons of material each year to a composting facility. Then the nutrient-rich compost material is available back to our customers at no cost.

Bags of compost must be requested directly from the Solid Waste Management Department. We are not able to make individual deliveries so the best way to get free compost for you and your neighborhood is to schedule a presentation by one of our Recycling Coordinators at your next HOA, Town Hall or community meeting. We will not only give your attendees some great tips on recycling but will bring free compost with us! We can deliver up to one pallet which is 60 bags, each containing one cubic foot of material.

To request a presentation, please provide at least two weeks' notice. Click here to [CONTACT US](#).
